THE PROJECT

We are a company that will be associated with orchards. The orchards bring us the products and we take care of selling those products.

We are a team made up of four people, the coordinator (Nahuel Galeano), the sub-coordinator (Camilo Soca) and two members (Julián Olivera and Fabian Cardozo).

S.W.O.T ANALYSIS

STRENGTHS

- The staff has experience with the technologies to be implemented.
- Company specialized in the environment.
- Simple software for the understanding of the average user.
- Motivation of the staff in each project.

WEAKNESSES

- Company with no experience in the labor market.
- The software will need a minimum knowledge in computing.

OPPORTUNITIES

- Company that works with high-level tools and the most recent technologies on the market.
- New company in the area of minor service costs.
- We are aware of every innovation of new programs and tools.

THREATS

- Possible system vulnerabilities.
- Possible plagiarism to the software and that another company has minor expenses when recreating it.

Executive summary

What is about the project?

The project we are carrying out is for a company in which we are associated with orchards, and we sell the products that the orchard gives us.

How we made the website?

We have to make a web page FRONTEND (which we do with HTML and we give it a design with CSS and JS) backend(PHP MYSQL) and we are going to market the products there.

How did we make the database and the operating system?

We have a database that is made with MySQL. The operating system that the users' computers will have will be Windows 10 and that of the Fedora server.
